SUMMARY

Computer Engineering student at UFC, graduating in December 2026, seeking opportunities in Software Engineering and/or applied Machine Learning (ML). Currently, I work mainly with backend development in Java, but I also have experience with frontend development, IoT, and data science. Additionally, I've been studying and practicing computer vision and agentic AI.

EXPERIENCE

Undergraduate Research Fellow (CNPq) | Backend Developer

GREat (Computer Networks, Software Engineering and Systems Group)

09/2025 - Present

- I work with **Java** and **React** on a prototype **quality-of-life monitoring platform** that integrates biometric data from wearables and clinical assessments, generating insights for doctors and patients.
- I research and study ML algorithms applicable to the data used by the platform, assessing their performance to improve the reliability of inferences in **health monitoring** scenarios.

Undergraduate Research Fellow (Funcap) | IoT Developer

NuTec (Center for Industrial Technology and Quality of Ceará)

04/2025 - 08/2025

- I developed an **IoT prototype for automated irrigation** with ESP32, reusing condensed water from air conditioning units.
- I implemented the control logic in **C/C++**, configured the two sensors and the telemetry flow, and set up cloud persistence using **MQTT** and **Supabase**. In addition, I configured a **Grafana** dashboard for real-time and historical monitoring.

Embedded Systems Developer

LESC (Computer Systems Engineering Laboratory)

12/2024 - 01/2026

- I worked at **Clube do Hardware**, an extension project at UFC, developing educational prototypes in **C/C++** with **ESP32** or **STM32**, integrating sensors and modules into IoT projects. I also managed teams during the execution of two projects.

Web Developer (Frontend and Backend) | Marketing Manager

GTI Engenharia Jr.

12/2023 - 02/2025

- I worked as a web developer delivering more than four **institutional websites** and **on-demand systems** (e.g., blogs), using the **MERN stack** with MongoDB, Express, React, and Node.js to implement features and interfaces.
- As **Marketing Manager**, I led the team during **prospecting** and **lead qualification**. In addition, I structured commercial proposals, conducted more than five **negotiations**, and monitored alignment between scope and the technical execution.

EDUCATION

B.Sc. in Computer Engineering

03/2022 - 12/2026

Federal University of Ceará (UFC)

Vice-President, IEEE CASS Student Chapter (UFC)

09/2025 - Present

- I participate in a study group and undergraduate research initiation with FPGAs, practicing and learning hardware front-end design tools and studying HDL and Verilog.

Teaching Assistant, "Applied Computational Intelligence"

09/2025 - 01/2026

- I supported around 20 students by providing explanations and suggestions for technical improvements and scientific writing in course assignments.

SKILLS

- Languages:** English (B2).
- Programming Languages & Tools:** C/C++, Python, TypeScript, Verilog, Git, Linux, Docker.
- Data Science & ML:** Pandas, PyTorch, OpenCV, CrewAI, RAG.
- Software & Databases:** React, Node.js, Express.js, MongoDB, PostgreSQL, Prisma ORM, Spring Boot, FastAPI, AWS Services.
- Hardware:** ESP32, STM32, Firmware development, FPGA-based System Design.

CERTIFICATIONS & COURSES

[Quantum Tech Track](#): Quantum computing, variational circuits, and introduction to quantum ML.

CESAR School & Instituto Eldorado (Brazil Quantum Camp)

02/2026 - 03/2026

[Fundamentals of Deep Learning](#): PyTorch with CNNs, data augmentation, transfer learning, and introduction to NLP.

Nvidia DL Institute (in-person workshop)

11/2024

[Introduction to Data Science](#): Python and Pandas, exploratory data analysis, data preparation, and basic modeling.

Instituto Atlântico (Avanti Bootcamp 2023.2)

11/2023

COMPETITIONS

- [2024](#) e [2025](#) ICPC South America Brazil First Phase (Honorable Mention)
